

Sara's Garden provides an unsurpassed level of care and treatment in our state of the art facilities where your comfort is our top priority.

The professional staff at Sara's Garden is trained to provide specialized, comprehensive Hyperbaric Oxygen Therapy treatments. When you are a client at Sara's Garden you are attended in the chamber by trained medical personnel at all times during the treatment process.

The Sara's Garden staff who will be working with you is a team of caring professionals that include:

- Board-certified physicians
- Certified nurse specialists and EMTs
- Trained hyperbaric technicians
- Experienced staff to assist with appointments, medical records, and health insurance processing

The two multi-place chambers at Sara's Garden allow for flexibility in scheduling and accommodation of diverse client treatment requirements. Our video monitoring and voice communications systems allow for a constant link between the hyperbaric technician operating the chamber and the trained medical personnel inside the chamber with the clients.

Our hyperbaric chambers provide a spacious interior to relieve any possible claustrophobic anxieties and allow clients the freedom of mobility. Clients can adjust their position as needed throughout the treatment to meet their specific needs for comfort.

Both chambers provide multiple view ports so family members can observe their loved ones during treatments. Because we can treat multiple clients at the same time, it also allows clients to build relationships and companionship with our staff and other clients during treatments by providing them with the ability to talk, play games, watch tv/movies, read, and listen to music.

At Sara's Garden, we pressurize both of our chambers with air and then administer oxygen through clear, easy to use, non-confining Amron hoods. This helps to keep the cost of treatments down. It is also the safest means of performing the treatments and greatly reduces the risk of fire that could come with flooding the entire chamber with oxygen.

Our Healing Chambers

Our original hyperbaric chamber was donated by the United States Navy. It is a refurbished and reliable U.S. Navy dive chamber.

- Seats 5 Clients/Staff
- Overhead Oxygen Hookup
